Note:

1. Please refer to the scoring rubrics in the course syllabus
2. Each students need to answer all the questions above
3. The questions should be given to the students before the interview week (week 8)

Homeless people, who may be individuals or families, often experience extreme poverty, housing insecurity, and social isolation.

As far as I'm concerned หรือ **To my mind** >> Anyone who doesn't have a permanent place to hang their hat, and who doesn't know where their next meal is coming from, is someone that I feel bad for.

Processed food is food that has been altered from its natural state, using techniques such as cooking, canning, freezing, or adding preservatives. While some processed foods can be healthy, others may be high in unhealthy ingredients and should be consumed in moderation.

In my point of view, processed food can be part of a healthy diet, but some may contain high levels of calories, unhealthy fats, and added sugars. To maintain a balanced and nutritious diet, it is important to read food labels and choose minimally processed foods whenever possible.

*****IF Teacher Asking "What you do mean by that? "processed food can be part of a healthy diet"**

Answer >>>> Not all processed foods are unhealthy or bad for you. In fact, some processed foods, such as frozen fruits and vegetables or canned beans, can be nutritious and convenient options for a healthy diet.
